535,00 € bez DPH

Beautiful ceramic sink **Farmhouse 800.2** by Chambord brand, is made by prestigious German company Villeroy & Boch. This sink is designed by French designers, manufactured using the best traditional techniques. It is a perfect combination of French sophistication and everyday comfort. It suits stylish kitchens such as Shabby Chic style, the kitchen will be the coziest place in the house. At the same time, the sink will look great in a rustic kitchen. It will also find its place in modern design.

The Chambord Farmhouse 800.2 is a ceramic double sink. It is a two-chambered ceramic sink and sink in one. Two equally sized chambers are ideal for food preparation. We recommend the sink for larger kitchens. The sink basin is deep enough (approximately 20 cm) for comfortable dishwashing.

Chambord Farmhouse 800.2 is an ideal purchase if you are considering a double ceramic sink in a **modular design**, with installation on a cabinet. Its advantage is the possibility to position the kitchen faucet directly on the sink. You will especially appreciate this fact if you own a wooden or laminate countertop, as installing the faucet on the countertop could potentially cause leakage and damage to the material.

The ceramic sink is **very durable** against impacts, scratches and high temperatures, it is hygienic and safe for health. All dirt can be flushed away with water. Ceramic sinks are colorfast. The sink will maintain its radiant white color even after several years.

Key features of the CHAMBORD FARMHOUSE 800.2 kitchen sink

- White ceramic sink.
- Farmhouse 800.2 has an extended warranty of 5 years.
- The Chambord logo is located on the front of the sink in the right corner.
- ideal choice of sink for stylish kitchens

- it will blend beautifully with a wooden kitchen counter.
- two practical sink basins, basin depth approximately 20 cm
- the sink is intended for modular installation
- Ceramic sinks are exceptionally resistant to impact, scratches, and UV radiation.
- drilling a hole for the battery for free

A ceramic sink is fired in kilns and the glaze is applied by hand, making each piece unique. It is necessary to take into account a tolerance of +/- 1-1.5 cm in dimensions. We recommend having the sink physically available for the realization of the kitchen counter.
