EAN: 8595163528963

**143,28 €**

119,40 € bez DPH

The new product on the market is the Seina SE918.0 kitchen faucet, which is designed for "two waters" - drinking and utility. The faucet is produced by **Czech company Slezák - Rav CZ, s.r.o.**, which emphasizes honesty and tradition. It has been in the market since 2001. The Slezák Rav CZ, s.r.o. brand offers an above-average ten-year warranty on their products.

**Battery RAV - Slezák Seina SE918.0** is specially designed for households that use two types of water. One type is used as utility water in the kitchen, for example, for dishwashing. And the second type is drinking water, or optionally filtered water. This water is always cold.

These waters are connected separately to the batteries and pass through the entire battery, including the handle, separately. This handle is made so that inside the handle there is a little tube through which drinking / filtered water flows all the way to the faucet, where it also flows out separately.

The Seina SE918.0 kitchen faucet **replaces two faucets** that were previously used in the kitchen. Today, the trend is to have one faucet for "two waters". It not only looks luxurious but is also very practical. It saves space around the sink, and there is no need to deal with two faucet installation holes. The faucet package includes three connecting hoses, see technical sheet.

We offer this battery in a variety of colors.

- Shiny chrome
