The replacement water filter for the **Spring Source RWF300A** refrigerators is compatible with **Samsung DA29-10105J-S** fridges that have an external filter on the supply hose (an external filter is used).

The **Spring Source RWF300A** water filter is designed for refrigerators with a source of drinking water and an ice maker.

The filters are certified by NSF/ANSI 42 & 372 Lead-free from NSF and IAPMO, European Food Grade Regulations EC-1935/2016, ROHS, REACH, BPA free, TUV, and the Australian watermark.

The Spring Source RWF300A water filter **removes unwanted substances from water**, such as chlorine (up to 99%), THMs, VOCs, and other impurities. This significantly improves the taste of drinking water while preserving the beneficial minerals for the human body. The filter is BPA-free and made from advanced coconut shell carbon. The outer layer has a 0.5 micron rating, ensuring better filtration. The filters are tested by an independent laboratory.

We recommend **changing the filter approximately every six months**. If you don't replace it on time,

it will lose its filtering capabilities. This means that you and your family may consume harmful bacteria, impurities, chemicals, and unwanted particles. This carbon filter is therefore an ideal solution for clean and safe drinking water.
